Ben,

This information was prepared by my staff (Jessica Kao) and I thought I would forward it to you for your consideration.

Most of the major watersheds where population and industry concentrate drain to the Gila River, which practically bisects AZ before eventually entering the Colorado at the AZ/CA border. Attached a simple map we have used for various briefings on AZ waters over the past few years to illustrate the point.

Based on a number of tallies done by our 404 enforcement office here last year, for the NPDES program alone, a majority of AZ's approximately 300 individual and industrial NPDES storm water permits and nearly 10,000 construction storm water permits concern discharges within these Gila tributary watersheds. (b)(5) deliberative & attorney client privileged
